

Fibre to the home solutions

Are you ready? We are.

Are you ready? We are.

With the National Broadband Network rolling out across Australia, and with selected areas already connected to fibre, your customer needs assurance that their home will be fibre ready. Will you have the answers they need?

At Hager B&R we have the answers. Our NBN solutions make preparing a home to be fibre ready, easy, efficient and most of all, worry free to both installers & home owners.

From stylish indoor enclosures to award winning, designer options for data points that complete the home, we have a comprehensive offer for any discerning contractor or home owner.

To be NBN ready, your choice is easy...

At Hager B&R we have developed a comprehensive range of NBN & distribution solutions that can not only accommodate the necessary fibre equipment supplied by the NBN for FTTH connectivity, but also a full range of patching & distribution equipment. Combine this with our Australian Design Award winning range of Data, TV, Telephone, Audio and other communication wall outlets and you have the solution to provide a simple installation with an enormous amount of flexibility for the home owner that also looks fantastic.

Our NBN-HDC Cabinets can be either surface or flush mounted and are provided with a non metallic door front to decrease any wireless signal loss through the cabinet.

NBN-HDC10 650mm H x 380mm W x 130mm D
Comes complete with: 1 x 2 gang GPO, 1 x 8 port Matchmaster Digihub RJ45 Patch unit (provisional space for a second patch unit of 8 ports – totalling 16 RJ45 patch points), Segregated fibre wall outlet (FWO) mounting area, mounting provision for PSU & NTD (ONT, NTU), Non metallic door front.

NBN-HDC20 1000mm H x 380mm W x 130mm D
